FACE RECOGNITION USING GEN AI

Advanced Technology

Gen AI utilizes cutting-edge technology for accurate face recognition and analysis.

Enhanced Security

Provides a secure and reliable method for identity verification and access control.

Efficient Authenticati on

Streamlines the authentication process, saving time and enhancing user experience.

AGENDA

 **3/21/2024**

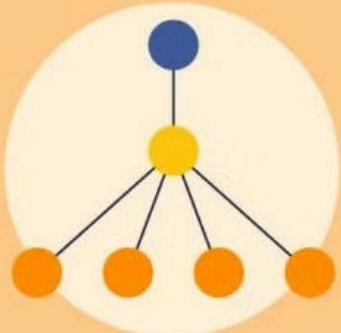

Annual Review

	T	W	T	F	S	S	M	T	W	T	F
	10	11	12	13	14	15	16	17	18	19	20
		Leadership Meeting					Central Meeting				
	7	8	9	10	11	12	13	14	15	16	17
		Me	Exchange				Me		Me	Check-in	
	4	5	6	7	8	9	10	11	12	13	14

PROBLEM STATEMENT

3/21/2024 Annual Review

PROJECT OVERVIEW

Project Initiation

The project was initiated with a comprehensive analysis of the requirements and objectives.

Testing and Validation

Thorough testing and validation processes were conducted to ensure the accuracy and reliability of the facial recognition system.

1

2

Development Phase

During this phase, the team worked diligently to implement the proposed solution and refine the algorithms.

3

WHO ARE THE END USERS?

For the Annual Review on 3/21/2024, we will discuss the end users of the project.

SOLUTION AND ITS VALUE PROPOSITION

Solution

The proposed solution addresses the core challenges and provides a comprehensive approach to solving the problem.

Value Proposition

The value proposition outlines the unique benefits and advantages that the solution offers to the end users.

Strategy

The strategic plan ensures that the solution aligns with the goals and objectives of the project, maximizing its impact.

THE WOW IN SOLUTION

3/21/2024 Annual Review

MODELLING

Team Collaboration

Teams can add wireframes

Creative Brainstorming

Teams can add wireframes

RESULTS

95%

Accuracy

High level of precision in identification

98%

Efficiency

Fast processing speed for real-time recognition
